PROFESSIONAL SUMMARY

Technical Service Operations manager with 16+ years building support and operations systems that scale without sacrificing quality. Develops people through structured 1:1s, reviews, and onboarding; owns KPIs (response time, FCR, CSAT, SLA); and champions automation-first operations (AI ticket routing, deflection, self-service KB) with measured ROI. Builds data-driven workforce-forecasting and scenario models, manages multi-channel queues and SLA risk via dashboards, and serves as Voice of the Customer with a structured feedback loop to Product and Engineering. Comfortable with BI tools, support-platform analytics, and HIPAA/SOC 2-aware operations.

CAREER SNAPSHOT

16+ Years in IT / Cloud / Reliability Engineering
100% SLA Across 20+ Mission-Critical Services
30-35% Incidents Auto-Resolved via AI Automation
25,000+ Stale Incidents Eliminated
85%!98% Operational Efficiency Lift
15-32 Engineers Led Across Global Teams

KEY ACHIEVEMENTS

- Championed automation-first operations and AI tooling, driving 30-35% deflection/auto-resolution and eliminating 25,000+ stale incidents.
- Sustained 100% SLA across 20+ services through disciplined queue and SLA management with predictive dashboards.
- Built data-driven workforce-forecasting and scenario models to guide staffing and SLA decisions.
- Set and enforced KPIs (FCR, CSAT, SLA) and developed people through structured coaching, reviews, and onboarding.
- Acted as Voice of the Customer — turned ticket/telemetry patterns into product and process improvements.

TECHNICAL COMPETENCIES

Support Leadership: Team Supervision & Coaching, Performance Reviews & 1:1s, KPI Ownership (FCR, CSAT, SLA), Onboarding & Training, Accountability & Psychological Safety

Automation & AI: Automation-First Operations, AI-Assisted Ticket Routing, Chatbot Deflection, Self-Service KB Optimization, Automation ROI Measurement, GenAI Tooling

Workforce Planning: Inbound Volume Forecasting, Headcount / Capacity Modeling, Scenario & SLA Modeling, Seasonality & Growth Analysis

Queue & SLA Management: Multi-Channel Queue Monitoring, Real-Time Escalation, SLA/SLO Baselines, Aging Prevention, Performance Dashboards

Data & Reporting: BI Tools / Power BI, Kusto (KQL), Executive Reporting, Leading/Lagging Indicators, Data-Driven Decisions

Platforms & Compliance: Zendesk / Salesforce (concepts), Workflow & Report Configuration, HIPAA / HITECH / SOC 2 (aware), DICOM / HL7 (familiar), ITSM

TECHNICAL PROFICIENCY

Support Team Leadership & Coaching — **Expert**

Automation-First & AI Tooling Roadmap — **Advanced**

Workforce Forecasting & Capacity Modeling — **Advanced**

Queue & SLA Management (multi-channel) — **Expert**

Data & Executive Reporting (BI / KQL) — **Advanced**

Support Platforms (Zendesk/Salesforce concepts) — **Working**

Voice of the Customer / Cross-Functional Advocacy — **Expert**

Healthcare Compliance Awareness (HIPAA/SOC 2) — **Working**

PROFESSIONAL EXPERIENCE

Manager, Technical Service Operations & Escalations — Xbox Cloud Services

Microsoft Corporation (via TechMahindra) | Redmond, WA | May 2021 - Present

Owns the support and operations experience for a 24/7/365 platform serving millions; builds systems that scale without sacrificing quality.

- Supervise, coach, and develop technical support/operations engineers — structured 1:1s, performance reviews, and documented feedback tied to measurable outcomes; built a culture of accountability and psychological safety.
- Set and enforce team KPIs (response time, resolution rate, first-contact resolution, CSAT-equivalent, SLA adherence); sustained 100% SLA across 20+ services.
- Championed an automation-first mindset — identified, prioritized, and implemented AI/automation that eliminated 25,000+ stale incidents and 500+ alerts; architected AI incident automation reaching 30-35% deflection/auto-resolution.
- Owned the AI tooling roadmap — AI-assisted ticket routing, automated response suggestions, and self-service knowledge-base optimization; measured automation ROI via deflection and handling-time reduction.
- Built data-driven models forecasting inbound volume, SLA attainment, and headcount; ran scenario models (e.g., "SLA impact if volume grows 30% without added headcount") to support staffing decisions.
- Monitored daily queues across channels, reassigned/escalated in real time to maintain SLAs, and built dashboards (Kusto/KQL, Power BI) surfacing leading indicators of SLA risk before breaches.
- Acted as Voice of the Customer — synthesized ticket data, feedback, and incident patterns into actionable product/process improvements via a structured feedback loop to Product and Engineering.
- Built executive-level reporting on team performance, SLA attainment, automation ROI, and utilization; partnered with Dev/Product to integrate support tooling with internal systems.

Technical Support Operations Lead — Customer Support Services

Microsoft Corporation (via Mindtree) | Redmond, WA | Nov 2016 - May 2021

Led a 15-engineer B2B support/operations team with measurable SLA and satisfaction improvement.

- Supervised and developed a 15-engineer team; set KPIs and built onboarding plans that accelerated time-to-productivity.
- Identified skill gaps and ran targeted training on product knowledge, soft skills, compliance, and tooling.
- Implemented automation and workflow optimization (ticket routing, response automation) reducing manual workload.
- Partnered cross-functionally with Product, Engineering, and Implementation to deliver a consistent customer experience.

Support Operations & Live Site Lead

Microsoft Corporation (via Mindtree) | Hyderabad, India | May 2012 - Nov 2016

Led 12 senior + 20 engineers running support operations and SLA management at 99.95%+ SLA.

- Built queue-management and SLA-monitoring practices; prevented aging issues and maintained channel performance.
- Built PowerShell automation and reporting saving thousands of manual hours; standardized operational practices.
- Ran incident, problem, and change management; mentored specialists into technical leads.

Systems Analyst / Technical Support Engineer

IBM (via Infosoft Inc) | Hammond, IN | Sep 2009 - Nov 2011

Technical support and operations across enterprise environments.

- Resolved complex technical issues; documented procedures and improved consistency of recurring operations.
- Scripted repetitive tasks to reduce manual effort and improve resolution times.

SELECTED PROJECTS & CASE STUDIES

AI & Automation-First Roadmap — Owned an AI tooling roadmap (assisted routing, response suggestions, deflection, self-service KB) with measured ROI via deflection and handling-time reduction; 30-35% auto-resolution.

Workforce Forecasting Models — Built data-driven models forecasting inbound volume, SLA attainment, and headcount, plus scenario models (e.g., +30% volume vs. SLA) to guide staffing decisions.

Queue & SLA Health System — Built multi-channel dashboards surfacing leading indicators of SLA risk before breaches and prevented aging across queues.

Voice of the Customer Loop — Synthesized ticket data, CSAT feedback, and incident patterns into actionable improvements via a structured feedback loop to Product and Engineering.

Executive Reporting — Built reporting on team performance, SLA attainment, automation ROI, and utilization for leadership decisions.

People Development & Onboarding — Structured 1:1s, performance reviews, and iterative onboarding plans that accelerated time-to-productivity and closed skill gaps.

LEADERSHIP & COLLABORATION

- Led and mentored global teams of 15-32 engineers across the US and India, growing individual contributors into technical leads.
- Central escalation authority and SME for high-severity incidents, coordinating Security, Engineering, Product, and business teams under pressure.
- Ran 1:1s, performance reviews, onboarding, and targeted coaching/enablement plans; built psychologically safe, high-accountability culture.
- Synthesized incident and reliability data into executive reviews driving investment and process decisions.
- Early operationalizer of AI/automation in production support and operations; champion of continuous learning.

CERTIFICATIONS

- Microsoft Certified IT Professional — Azure Infrastructure Solutions (70-533, 70-534)
- Microsoft AZ-900 — Azure Fundamentals
- Google Cloud Computing Foundations
- Google — Introduction to Generative AI
- TechMahindra AI White Belt

EDUCATION

- Bachelor of Engineering in Computer Science Engineering, JNTU, Hyderabad (2008)

PROFESSIONAL PHILOSOPHY

Build the system, not just the team: automate everything that does not need a human, forecast with data instead of instinct, manage SLAs and queues proactively, and treat the Voice of the Customer as a driver of the roadmap — so support scales without sacrificing quality.
